

Case Study

Tap'N'Care

About Tap'N'Care:

Tap'N'Care is a Canada's leading provider of Healthcare Professionals using smart technology to connect families or facilities. Tap'N'Care was started to revolutionize workforce management strategy in the healthcare sector. They believe quality care should be readily available and easily accessible either for advance or last-minute requests.

Our Awards:

Problem Statement:

They faced challenges in acquiring the required skill sets from their existing suppliers to meet their business needs.

Approach:

Identify the specialized expertise required to fill the identified gaps. Continuously assess the performance of chosen experts based on predefined metrics and KPIs. Seek feedback from the client to ensure their evolving needs are effectively addressed.

Solution:

We conducted a comprehensive analysis of their needs to fully grasp their challenges. Following this, we assembled a team of highly skilled RPG developers known for their expertise in handling complex development tasks. By customizing a team to their precise requirements, we aimed to address every aspect of their development needs with precision and efficiency. Our dedication to delivering high-quality solutions is evident in our strategic approach to providing specialized expertise, empowering our clients to overcome obstacles and achieve their goals confidently.

Outcome & Benefits:

We completed the development of their Android and iOS apps, as well as their website, to the client's full satisfaction. This integrated digital solution greatly enhanced their online presence, increased brand awareness, and improved customer engagement. By aiding in lead generation and offering a consistent user experience across various platforms, our work has been instrumental in stimulating business growth, attracting new customers, and enabling the client to accomplish their strategic goals.

Technology Used:

Swift, Kotlin, JavaScript, Laravel, MySQL

Testimonial:

Megamax Service's knowledge of the mobile application ecosystem, innovative applications, and the developer community is fantastic. They're always hands-on, and their resources are go-getters. I couldn't thank them enough for all the effort made in our successful application.
